

# The Green Panel

At least one current license

**How this business was identified:** matched to Michigan LARA license records by business name (confidence: high). This is a name-matching process, not a direct lookup by a single ID the way a license-number search would be — if this doesn't look like the right business, the license records below may belong to a different, similarly-named company.

## Licenses on File with LARA

### Electrical Contractor

LICENSE NUMBER

6108479

EXPIRATION DATE

2027-12-31

STATUS

Issued

### Residential Builder Company

LICENSE NUMBER

262100293

EXPIRATION DATE

2024-05-31

STATUS

Lapsed

## Disciplinary Actions & Complaints

### Not yet available for Michigan

This directory has not yet built a disciplinary-action, BBB complaint, or bankruptcy-filing data source for Michigan installers (unlike some other states in this directory, where that data has been collected). The absence of flags here means this hasn't been checked yet — it is not a claim that this business has a clean record.

License data sourced from the Michigan Department of Licensing and Regulatory Affairs (LARA), Bureau of Construction Codes, via the public Accela Citizen Access license search ([aca-prod.accela.com/LARA](https://aca-prod.accela.com/LARA)), retrieved 2026-09-17. Michigan has no dedicated solar installer license classification — this business is matched by name across the Residential Builder, Residential Builder M&A, and Electrical Contractor license types, any of which solar work may legally require. This report reflects what LARA has published as of the retrieval date and is not a substitute for confirming status directly with LARA's Bureau of Construction Codes before hiring.
